A Thief Folici.

Last evening on the mail train from Cincinnat east an incident happened between Clarksburg and Grafton which illustrates the necessity for caution on the part of travelers. A lady, Mrs. Sopha Mullahaner, was on the train, en route from Vincennes, Ind., to Brooklyn, N. Y. A few minutes before the train, en route from Vincennes, Ind., to Brooklyn, N. Y. A few minutes before the parse, which contained some \$125 in money and her ticket. She made her loss known to some of the fellow passengers, and one of these recognized among the passengers Capt. J. W. Haggerty, the well known detective. He was informed of the circumstances of the tobbery, which were poculiar, the pocket book having been taken from inside the bosom of her dress. There was no clue to the thief, but after making a tour or two through the train, Haggerty fixed his suspicious upon one of the men in the car. Of late, a meeting of the Board of Education has not been complete without some reference to the heating apparatus of the Third ward school. Since 'the building was built the heating apparatus has cost more and given more trouble than all the other apparatuses of the city. Dr. Jepson has always contended that it was owing to the ignorance of the janitor, and at the last meeting of the Board had the salary raised from \$50 to \$50 in order to sective a good man. The present incumbent is Stephen Trany, whom Dr. Jepson did, and does got consider competent, while the other two Commissioners were bound to have him reappointed for this year and so recommended. Dr. Jenson protested, also Mr. Todd, but all to no avail. Tracy was reappointed, but before so doing the salary was cut down to \$20 again. Before this was done a letter 'was read from Thompson & Hibberd, recommending James Naegle and offering to supervise his work tree of charge.

After all the work was disposed of, Dr. Hildreth, a Clay district commissioner, rose and delivered a long speech, ending by offering the following:

Revelval, That the proper heating and heating apparatus of the Third ward (Clay) school house be referred to the Compissioners of Clay district, with power to contract with responsible parties for a sun not to exceed \$1,200, who will agree to put said heating apparatus in perfect running order and guarance, the same, no money to be paid said contractor until sifter a full and continued trial, which, shall, be entirely satisfactory to said Commissioners, otherwise, said contractor will forfeit the value of his repairs or improvements. The resolution was lost,

After all moved that the vote confirming Stephen Trany as janitor be reconsidered; this was also tox.

General Services with those of last year; but after examining the books of last year; for my district I discovered that the following are a few of the errors contained therein: Frequent instances of the same family being cointed more than once; colored persons living with a white family or working for them, were counted with the family and also separately. All the boarders in boarding houses and also still lodgers were counted without regard to their boarding or lodging places. The decrease from last year is so great that it must be due to the errors or mistakes of some one, and feeling confident of the correctness of my work, I name the above errors which may be found upon examination of the returns for last year, It will require but a short time to discover that the returns for last year, I will require but a short time to discover that the returns for last year, are far from correct, Respectfully submitted,

matter, agreed that there was some mistake
somewhere, but where, they did not know,

Yesterday forenoon he and Mike Dinger, another member of that club, were at the river's edge catching crawish for bait, when their skiff, which had been pulled partially out of the river upon the beach, was washed off by the waves of a passing boat. Neither of the boys noticed it until it had floated off some forty yards or so from shore. Then Will sprang into the water and started to swim out to recover it. He had almost reached the boat when he noticed the Ed Hobbs coming directly towards him, and turned to swim back to shore. He had gone but a few yards when, it is presumed, he was seized with cramp, and cried for help. Illis companion, Dinger, who was watching from the shore, started to swim out to his assistance, but almost immediately a wave swept over Lewis, strangling him, and he sank, never to rise until he was taken out, stone dead, an hour later. This being the first day of the campmeeting proper, many began coming in very early, and wherever you passed the camp, you were forcibly reminded of April first is the city. There are some few of the cottages yet unoccupied, but mone for rent. In fact, the demand for cottages and rooms for sleeping is unprecedented in the history of this place. So great has been the demand that a company has now been formed to build during the coming year ten or twenty cottages rauging in price of construction from \$100 to \$250 each. These will be built after the most modern style of architecture and will contain from four to six rooms each, and will be so arranged in their inner part that they can be used either as sleeping apartments only, or used by families desiring to "cat themselves." g or used by families desiring to "cat themsolves."

It is also intended to sell to any member of the company desiring a cottage for their own a use, one at the cost price of building, and to it others at a small margin above the cost of erection. This will be the opportunity for the manner of the company desiring a cottage for their own a tree, one at the cost price of building, and to it erection. This will be the opportunity for the man whose purse is not bursting with a government bonds and trade dollars toobtain a home, where he can send his wife and little ones away from the smooth and heat of the city during the summer months, and where with pure air, and the purest water, a man would hardly recognize his own mother after the hard solourned here for thirty days or more, and while I am on this subject let me say that it is possible for a family of five to seven to remain here at a cost not exceeding to the economy used by the "cook," I am thoroughly convinced of the fact that there is no place within a radius of three hundred miles distant from here where a man can green more benefit both as regards "soul and we will do you good."

Last evening the second entertainment was given by the young ladies of Leatherwood, given by the young ladies of Leatherwood, assisted by some of their visitors and same gentlemen from town. The mode enjoyable part of the eyening's pleasures was the presentation of a little one not comedy farce entitled "kis on parke Francaia." It has often been given at prominent theatres of the country, but never, we predict, did actors enjoy playing more, or an hudlence derive more pleasure from a presentation than was lad last night. The cast of "characters was as follows: s follows:

The Jews of Bellaire will soon have a cemetery of their own, having bought a plat of ground near the Davis cemetery, on the Winding Hill road.

Nearly a thousand head of cattle passed through the B. & O. pens here yesterday, bound for l'hiladelphia. Two of them were dead when the cars were opened here; the rest were in good condition.

The forsnoon train west on the B. & O. road has been delayed every day lately, to the disappointment of those going to Burr's Mills. The delays are caused by hauling peaches, several cars of which go with the passenger train every day.

Mr. Welsh, who has been teaching in the school district immediatelely south of town, has taken the place made vacant by B. F. Cockayne, at Baron's, and temporarily filled by Stewart Wilson. Mr. Stitt, of Glence, will take the vacant school.

filled by Stewart Wilson. Mr. Stitt, of Glence, will take the vacant school.

The talk that has been going about for some weeks of the probability of our soon having another window glass house, seems now to be taking more definite shape, and it is probable that formal preliminary steps will soon be taken for the organization of a company. The National Glass House, of Rodefer Brothers, has commenced operations, and the window glass houses are getting ready to start promptly with the close of the regular yearly vacation. Except in neghborhoods directly connected with the nail worksour town is putting on its working clothes.

The grades established for our streets by the recent ordinance do not affect a number of the streets on the hill sides. This is because these streets have not yet been accepted by the city. The highest point touched by the ordinance is at the west end of Thirty-eighth street, in Horn's addition—167 feet above the starting point.

A great deal of improvement is apparent in Liberty, in the way of buildings and repair of farms generally.

Mr. Simonton, of Cameron district, was mong us a few days ago, presenting his blaims as candidate for the State Legislature.

Mr. Simonton is a courteous gentleman and exceptionally well informed on all matters of public concern, and his support from Liberty we think will be strong.
